

BIOSCIENCE NETWORK ACQUIRES
WWW.STEMCELLRESOURCES.ORG

FOR IMMEDIATE RELEASE

January 1, 2008
Lake Hopatcong, NJ.

Bioscience Network, Inc. (BSN) today announced the acquisition of the world-acclaimed educational website www.stemcellresources.org. The site was purchased from the Biology Teachers Association of New Jersey (BTANJ), terms were not disclosed.

www.stemcellresources.org is used by educators, researchers, thought-leaders, government officials, the news media and the general public to better understand the complex and often controversial subject of stem cells. All material on the site is peer-reviewed for scientific credibility and factual accuracy.

“We are very pleased to have www.stemcellresources.org join our educational initiative,” said Martin D. Mick, Executive Director of Bioscience Network. “This acquisition fits well with our mission to advance scientific understanding among young people and better development the next-generation science workforce.”

Bunny Jaskot, President of BTANJ, added, “This purchase by BSN allows www.stemcellresources.org to expand beyond our present capabilities and to reach a broader audience in more technologically advanced and innovative ways. We look forward to working with BSN.”

Bioscience Network is a publisher of online science education materials. It is committed to improving the efficiency and effectiveness of education in the biological sciences - particularly at the K-12 level - through collaborative public-private partnerships and the creation of scientifically valid resources useful to society at large. The projects BSN pursues are intended to impact education and motivate tomorrow's workforce to explore careers in the biological sciences. BSN is a for-benefits organization: 100% of our proceeds are re-invested to advance its educational mission.
